

# Pink Pumpkins

## [PM60-10 - Porcelain Doll Pumpkin Seeds](#)

120 days. Cucurbita maxima. (F1) Porcelain Doll Pumpkin. The plant produces good yields of 10 to 25 lb pink pumpkins.

Pumpkins start out pale yellow, then cream, then pink when fully mature. Multiple harvests are required because pumpkins develop and mature at different times as vines grow. For the best pink color, harvest when the cork has developed on a stem. An excellent choice for home gardens and Farmer's Markets.

**Disclaimer Note:** Some environmental conditions and stress can cause a plant to produce non-pink pumpkins! Such conditions that may cause non-pink pumpkins are excessive heat, abnormal PH in soil, and too much fertilizing. Depending on conditions, the true pink color of pumpkins can range from 40% to 90% of the harvest. Non-pink pumpkins can exhibit blotchy coloration, ranging from blue grey to green, to salmon-orange color.
