

Okra

[OK30-50 - Jambalaya Okra Seeds](#)

50 days. *Abelmoschus esculentus*. (F1) Jambalaya Okra. This extra early maturing plant produces high yields of 6 to 7" long shiny dark green okra. Great for making fried okra, soups, stews, gumbo, and casseroles. This compact plant is just the right size for a home garden. Suitable for containers. An excellent choice for home gardens.
