

# Turnips

## [TP7-500 - Alamo Turnips](#)

33 days. Brassica rapa. (F1) This early maturing plant produces high yields of quality turnips roots and turnips greens. It has excellent flavor and delicious greens. Yields are up to 50% greater than standard turnip greens. Quick growing too, only 33 days! The plant has the ability for multiple cuts. Grown for tops only. An excellent choice for home gardens and market growers. Disease Resistant: TuMV.

## [ES3 - Emergency Survival Seeds Kit \(32 Vegetable Varieties\)](#)

This Emergency Survival Seeds Kit has 32 different vegetable varieties. The seeds are specially dried and sealed for long-term emergency survival seed storage. All seeds are open-pollinated heirloom varieties and 100% non-GMO. Emergency Survival Seed Kit should be a priority for any preparedness plan for national food shortages, war, or national disasters. The seeds selected are adaptable to short-season climates and do well in all regions of the country and are easy to grow for first-time gardeners. It includes planting instructions and a seed-saving guide. The kit includes Beans, Beets, Broccoli, Brussels Sprouts, Cabbage, Cantaloupes, Carrots, Cauliflower, Celery, Corn, Cucumbers, Eggplants, Kale, Lettuce, Okra, Onions, Peas, Parsnips, Pumpkins, Radishes, Spinach, Squash, Sunflowers, Sweet Peppers, Swiss Chard, Tomatoes, Turnips, and Watermelons. Buy and keep a supply of kits to provide for family security during times of uncertainty in the food supply chain. The kits are moisture-proof and come in a resealable bag.

## [TP6-500 - Just Right Turnips](#)

### [1960 All-America Selections Winner!](#)

50 days. Brassica rapa. (F1) This early maturing plant produces good yields of 4 ½ to 6" diameter turnips. The skin and flesh are pure white! It has mild flavored roots and delicious greens. Extremely cold tolerant. Stores well. Will store until spring. Sow in summer/fall for fall/winter harvests. It is not recommended for spring sowing because of a tendency to bolt early. Excellent choice for home gardens and market growers.

## [TP8-500 - All Top Turnips](#)

35 days. Brassica rapa. (F1) This early maturing plant produces high yields of quality turnip greens. Very flavorful. The plant produces large smooth green leaves with sturdy stems. Roots are not edible. Grown for tops only. Perfect greens for salads. An excellent choice for home gardens and market growers. Disease Resistant: TuMV.

## [TP4-500 - Golden Ball Turnips](#)

55 days. Brassica rapa. Open Pollinated. The plant produces good yields of 3 to 4" turnips. The skin is yellow and the flesh is yellow. Very flavorful, sweet, tender, and mild. Nice type for mashing! Both tops and roots are good and tasty. Keeps well, will store until spring. Excellent choice for home gardens. An heirloom dating back to 1859. United States Department of Agriculture, NSL 6109.

## [TP1-500 - Purple Top White Globe Turnip Seeds](#)

57 days. Brassica rapa. Open Pollinated. Purple Top White Globe Turnip. The plant produces good yields of 4 to 6" diameter turnips. They are deliciously sweet and tender. Roots are white on the bottom and bright purple on top. Best when harvested when roots are 4 to 6". Leaves can be used as greens. Stores well. Excellent choice for home gardens. An heirloom variety dating back to pre-1880. United States Department of Agriculture, NSL 6119.

### **TP9-500 - Shogoin Turnip Seeds**

42 days. Brassica rapa. Open Pollinated. Shogoin Turnips. The plant produces good yields of 6 to 8" diameter turnips. The tops are tender and can be used as greens. Roots are crisp and firm and are best when harvested when young at 3 to 4". Perfect for soups, salads, or stir-fries. Also good for pickling! Thrives in hot dry weather. Grown commercially for greens. An excellent choice for home gardens, market growers, and open field production. United States Department of Agriculture, NSL 37048. A variety from Japan.

### **TP14-500 - Snowball Turnip Seeds**

45 days. Brassica rapa. Open Pollinated. Snowball Turnips. This early maturing plant produces good yields of 3 to 4" diameter white round turnips. They are round and white colored on the interior and exterior. They are sweet, tender, mild, and flavorful. Very delicious when eaten raw like an apple or grated and added to salads. Best when harvested when roots are small 1 to 2" in diameter. Stores well. A long time favorite in the South. Ideal for summer and autumn harvests. Excellent choice for home gardens. A variety from the USA.

### **TP3-500 - Tokyo Cross Turnip Seeds**

#### **1969 All-America Selections Winner!**

35 days. Brassica rapa. (F1) Tokyo Cross Turnip. This early maturing plant produces good yields of 2 to 6" diameter high-quality pure white turnips. The white flesh is firm, crisp, mild, and flavorful. Excellent pickling variety. Leaves are delicious and used as greens. Easy to grow and can be sown from spring to fall. They are cold-tolerant and also slow to bolt. An excellent choice for home gardens and market growers.

### **TP11-500 - Topper Turnips**

36 days. Brassica rapa. (F1) This early maturing plant produces heavy yields of high-quality dark green turnip greens. It takes 80 days for roots to develop. Greens grow 28" tall. Roots can be eaten. Highly bolt resistance. Vigorous re-growth ability! The plant can have up to three harvests in addition to the first harvest. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 662790. Disease Resistant: TuMV.

### **TP5-100 - White Egg Turnip Seeds**

42 days. Brassica rapa. Open Pollinated. White Egg Turnips. This early maturing plant produces good yields of 3 to 4" diameter white egg shaped turnips. They are sweet, tender, mild, and flavorful. Best when harvested when roots are small. Stores well. Also known as Early White Egg Turnips. Excellent choice for home gardens. An heirloom dating back to the pre-1880s. United States Department of Agriculture, NSL 6126.

### **TP12-100 - White Lady Turnip Seeds**

35 days. Brassica rapa. (F1) White Lady Turnip. This early maturing plant produces good yields of 2 ½ to 3" diameter bright green turnip greens. The pure white roots are tender, sweet, and delicious. You can harvest roots at any time and they will not become woody. The leaves are virtually free of pubescence and can be used as greens. Bolt Resistant. Excellent choice for home gardens and market growers.
